

JUNE MEETING WILL BE HELD AT KANSAS CITY MUSEUM
SUNDAY, JUNE 14, 2:30 P. M.

Election of officers will take place at this meeting. All members are urged to be present. It is your responsibility to help guide the future of this club with your voice and vote. Of special interest will be a talk by Dellaverne Owen, one of our well-known members. Also our president, Mr. Paul Wheeler, will present a review of the past year's accomplishments of the club with a look into the future. No admittance charge will be made at this meeting. Memberships which are now due may be paid at this time. Remember, the place is Kansas City Museum, 3218 Gladstone Blvd. The date is June 14; the time is 2:30 P.M.

REPORT SEEING ESPECIALLY BRIGHT STAR
(Article taken from the Muskegon Chronicle, May 14, 1959)

Editor:

Somewhere I read that we "had some new stars in the heavens" but no one seems to know too much about them.

Early in May, about 9 p.m., I looked out to the western sky and saw one so big I almost tried to pick it. It was just like the Christmas stars that are pictured--six points with the bottom three about twice as long as the top three. I even called the neighbors out to look and watched the star for nearly an hour. Then had a kitchen errand for 10 minutes.

When I looked again, the star was making a hasty departure over Lake Michigan and to my knowledge has not returned.

It made me remember five years ago last winter when such a star was to be seen here and there for about two months. I found it outside my kitchen window one evening as I washed dishes. It seemed to have an intelligent control or to be manned by a personality. So, too, this one I saw recently.

My Bible says "In these days there will be strange things in the sky." How thrilled I am to be here now, when God is making his prophecies come alive before our very eyes.--Jessie M. Davis, 1878 Dowd St., Muskegon, Mich. Thanks to Mrs. Wm. L. Hubbard of Muskegon (the Wheeler's daughter), for turning this one in.

NEW CLUB FOR TOPEKA

On the afternoon of May 17 a group assembled at the home of Mrs. Deloris M. Trapp, 3315 Clare, Topeka, Kansas, and organized a saucer club. They decided on temporary officers with an election to be held soon. This method would also give them more time to select a name for the club, they reasoned.

Mrs. Trapp was made president and Mr. Harry Fleenor, 1033 Mulvane, secretary-treasurer. Other charter members are: Harold Wiseman, Dr. Albert Whiting, Mrs. Howard S. Searle, Melva Workman, Margaret Hersh, Harry Hardin and Mrs. Berneice Riley.

It is suggested that the clubs across the country add this club to your mailing list so that the Topeka UFO Club may have the enlightenment of your publications and releases.

We of Kansas City wish you pioneers a great success in enlightening your area. That the space brothers will shower you with an abundance of help is our prayer.

FLAMING BALL NEAR TOPEKA

The Topeka Daily Capital of May 2 carried a headline, "Flaming Ball Seen Falling Near Topeka." The Topeka Journal of May 2 carried a headline "Mystery Blaze Was Haystack."

The haystack report came from a Forbes Air Force dispatch which found the burning haystack at 1:00 a.m. The "flaming ball" was seen in the sky by at least five people; Mr. and Mrs. Walter L. Pennington, 1304 N. Central, Topeka; Mr. and Mrs. David Carreno, 3321 Pennsylvania, Topeka; and Miss Mary Passman, 318 South Cortland. They reported seeing the object at 10:10 p.m. This puts almost three hours between the sighting and the discovery of the burning haystack by the boys from Forbes.

Flaming Ball near Topeka (Continued)

Here is the story Mr. Walter Pennington gave us: "It was just a big ball of fire. It looked to me like it was 20 or 30 feet across. It was just a little bit longer coming down than it was across, but it was coming at an even speed. It didn't look like a meteorite because it wasn't going fast enough for one of those." "...It was coming down at about an 85 degree angle. We watched it a total of about 45 seconds before it disappeared behind the house." "...It seemed like it wouldn't be over 20 miles away at the most." "...I'd say it wasn't moving over 200 miles an hour at the most from what I could see of it." "...It was 10 to 12 miles east of Hoyte, somewhere up there. That would be about 20 miles north of Topeka, somewhere in that neighborhood, and a little bit east of Highway 75." "...They found the haystack north of Holton six miles. So they were way off course between what we saw and where they found their fire."

Through another interview it was learned that Mr. and Mrs. David Carreno saw the same object, though they live on the opposite side of town from the Penningtons. They reported it as being high above ground, looked a little larger than the moon and was several miles away. Also that it was moving rather slow, and was red streaked, like flames. They, too, reported it as being in a northerly direction, and not in the vicinity of the haystack.

So now we got haystacks.

LOOKING BACK

After the busy month of April, having two lectures, Dr. George H. Williamson on the 12th and Miss Dana Howard on the 26th, then on May 10th Dr. D. Roy Parsons, we feel we have had much food for thought and action. The experiences of these three people are all different, but the message they bring to us is one of light, truth and advancement to help us prepare ourselves for the new age that is being ushered in.

--L. W.
